

Conductivity Probes

Conductivity probes are used to measure the conductivity of non-ferrous materials.

Galaxy Encircling Coils (Differential Reflection)

GE Inspection Technologies offers highly cost-effective and flexible range of encircling coils for use with the in-line or off-line high-speed inspection of tubes, wires, bars, etc. Encircling coils within the same size range can be exchanged in a matter of seconds to suit variations in manufactured products. Contact us for more information.

Cables (to suit conductivity probes)

Instruments	Part Number	Cable Type
Locator 3s, Phasec 2s/2d	GALPJL5	12-way Lemo/4-way Lemo
Vector 22	GALPJM5	16-way Lemo/4-way Lemo
