

Rhythm[®] Flash! Filters

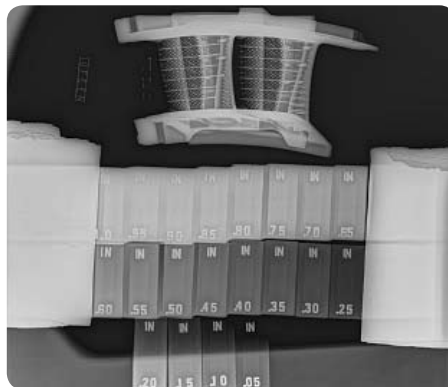

Software Solutions

Flash! Filters provide the sharpest view of weld and casting application images. As a plug-in module for the world class Rhythm Review Software, the clarity of the images significantly increase flaw detection while minimizing image analysis time. Flash! Filters is the only application specific solution on the market and is able to quickly convert flat digital images into film-like images.

- No Windows leveling
- Streamlined workflow
- Sharper images

Carbon steel pipe weld

Aircraft blade casting

Oil & gas pipe weld
